

SUPPLEMENTAL TABLE I. Criteria for the assignment of objective response measure scores

Objective Response Measure	Criteria	Score
Progressive disease 1 (PD1)	%hCD45 never drops below 1%; events observed before end of study; T/C \leq 1.5	0
Progressive disease 2 (PD2)	%hCD45 never drops below 1%; events observed before end of study; T/C $>$ 1.5	2
Stable disease (SD)	%hCD45 never drops below 1%; events not observed before end of study	4
Partial response (PR)	%hCD45 $<$ 1% for only 1 week	6
Complete response (CR)	%hCD45 $<$ 1% for 2 consecutive weeks	8
Maintained CR (MCR)	%hCD45 $<$ 1% for 2 consecutive weeks and at end of study hCD45% $<$ 1%	10

Scores of MCR, CR, and PR are classified as an Objective Response (OR).
