S1. Dendrogram representing PFGE-*XbaI* fingerprinting of *Salmonella* isolates recovered from Central Florida. All isolates that are >80% similar by PFGE are connecting with a line next to the dendrogram: solid line, group A; two short dashes followed by a long dash, group B; all short dashes, group D; all medium dashes, group G; F; alternating short and medium dashes, group I; long dashes, group H, dotted line, group I (only groups with four or more isolates are labeled on the dendrogram).
