

400

401 **Supplementary figure S3:** Decrease in *Spn* colonization with passive transfer of two different  
 402 doses of anti-PhtD antibodies (10 $\mu$ g and 25 $\mu$ g). Both doses showed significant reduction in  
 403 CFU/ml compared to control group. PcpA and Ply did not show significant difference with 10  $\mu$ g  
 404 dose (not shown).
