

Supplemental Figure S1

Supplemental Figure S1. Expression pattern of *pPLAIIIδ*

(A) The temporal expression of *pPLAIIIδ* and the root expression pattern in longitudinal and transverse directions based on data from Genevestigator (<http://www.genevestigator.com>).

(B) The relative expression ratios of *pPLAIIIδ* in various *Arabidopsis* tissues quantified by real-time PCR normalized to *ACT7*. Values are means \pm SD (n=3 replicates).
