

Supplemental Figure S3.

A Percentage of different element types

B Percentage of different elements

Supplemental Figure S3. Bioinformatic analysis of promoter elements in *pPLAIII δ* .

(A) Types of *pPLAIII δ* promoter elements related to various hormones. The hormone-related and light-related elements accounted for 25% and 17% of total elements, respectively.

(B) The promoter of *pPLAIII δ* included 19% hormone-response sites and 20% the light-response sites.
