	20/25-20/40	137	29(21.2%)		1.23(0.66,2.29)	
	20/50 or worse	114	14(12.3%)		0.64(0.31,1.33)	

\* From Fisher exact test.

†From logistic regression model.

“The Other” category included pigment, drusen, and non-leaking CNV.

VA=visual acuity; SPED=subretinal pigment epithelial detachment; DA=disc area; CNV= choroidal neovascularization; RAP= retinal angiomatous proliferation.
