

**Figure S7** GFP::H2B expression from reporter transgenes is increased in *fog-2(oz40)* females after *oma-1/2(RNAi)*. (A–F) The oocytes of *fog-2(oz40)* animals exposed to *oma-1/2(RNAi)* (B, D, F) were compared to the oocytes of *fog-2(oz40)* animals exposed to a non-targeting RNAi construct (A, C, E). Bar, 20  $\mu$ m.
