

Figure S1 Clearing effects in monocot and dicot leaf tissues. Images acquired using a Nikon D700 camera of *M. truncatula* (A,B), *N. benthamiana* (C,D), *A. thaliana* (E,F), and *P. sativum* (G,H), leaves before and after clearing. By week 3 of clearing, samples become optically clear evident against patterned backgrounds. Grid squares equal 15 mm.
