

Figure S1. Root density in the three research plots. Plot 2 = 268 stems/ha, Plot 4 = 1557, Plot 8 = 3559. Values based on ten replicate 1 cubic liter soil cores taken throughout each plot on 31 May, 2013. No significant differences were found (one-way ANOVA: $F = 0.14$, $DF = 2,27$, $P = 0.869$).
