

Table S5. The survival rate of PGCs purified by MACS.

Trials	Number of embryos used	Total number of cells isolated from embryonic gonads	Number of cells after MACS ¹	Viability (%) ²
T1	554	6.3 x 10 ⁷	593000	97
T2	577	7.3 x 10 ⁷	689000	98
T3	586	8.7 x 10 ⁷	813000	96
T4	326	3.1 x 10 ⁷	299000	97

¹Number of SSEA1-positive cells after MACS

²Percentage of live cells by trypan blue staining
