

AAV8-Luc (6w p.i.)

**ESM Fig. 11. Immunological islet damage in aged mice show mass of proliferating cells near islets with individualized insulin-positive cells.** Two representative islets from different aged AAV8-mIP2-Luc mice showing a rare occurrence of small insulin-positive cells (Red) within a mass of highly proliferative Ki67-positive (green) cells. Nuclei stained with DAPI (blue). Scale bars, 50  $\mu$ m.
