

## **Supplementary Information**

### **Identification of novel clinical factors associated with hepatic fat accumulation in extreme obesity.**

Gerhard, et al.

The Supplemental materials have the following sections in order:

1. Table S1. Clinical variables used in regression analysis (n=204 variables).
2. Table S2. Summary of 22 available published reports on 4274 patients with extreme obesity undergoing bariatric surgery and liver biopsy.
3. References for Table S2.

**Table 1:** Clinical variables used in regression analysis (n=204 variables).
