

FIGURE S2 Phenotypes of *tfg2* alleles in combination with Pol II alleles. A. Inability of *tfg2* alleles to rescue lethal LOF Pol II alleles detected by growth of double mutants on 5FOA (see Methods and Materials for details). B. Serial dilutions of viable *tfg2/rpo21 (rpb1)* double mutant alleles on various media for phenotyping of genetic interactions (general growth, temperature sensitivity, MPA^S, Gal^R and Spt⁻ phenotypes). LOF Pol II alleles are marked by blue bar, GOF by green. Heatmap presentation of phenotype quantifications of this assay is shown in Figure 2C.
