

SUPPLEMENTARY FIG. S2. RNAa-mediated *OCT4* activation inhibits cell viability of ADSCs and FDPCs. ADSCs 7F4089 and FDPCs 1011103.3 were transfected with the indicated dsRNAs at 50 nM. MTT assay was conducted 96 h following transfection. Results are plotted as the percentage of viable cells relative to mock transfections. $n=3$. * $P<0.05$; ** $P<0.01$; *** $P<0.001$.
