

Supplemental Figure 2. Mild skin phenotype in REDD1 KO untreated animals. **A.** Immunohistochemical staining of untreated B6x129 w.t. and REDD1 KO murine skin sections for expression of epidermal keratinocyte markers loricrin, keratin 5, and keratin 10. **B.** Morphometric analysis of the H&E stained sections of B6x129 w.t. and REDD1 KO mouse skin. REDD1 KO skin thickness is presented as % to thickness of w.t. epidermis.
