

Supplemental Figure 1. Nur77 inhibits hypoxia induced ET-1 expression. HUVECs were infected with Ad-LacZ and Ad-Nur77 virus (MOI=100) for 24 hours, cell lines were cultured under hypoxia or normoxia (1% O₂) conditions for 24 hours. The expression of ET-1 (A) and HIF-1 α mRNA (B) was detected by qRT-PCR. * $P < 0.05$ compared with vehicle under normoxia condition.
