Supplemental Figure 2: β -galactosidase activity in Miller Units of *E. coli* expressing MprF domain interaction partners (A and B) fused N- or C-terminally to adenylate cyclase fragments. C-terminal fusions encoded by low-copy number plasmid pKT25C and high-copy number plasmid pUT18C. N-terminal fusions encoded by high-copy number plasmid pUT18N. The mean of at least 3 independent experiments is shown.
