Supplementary Table SII MicroRNA-451, macrophage migration inhibitory factor (MIF) mRNA and MIF protein expression analyzed by stage of endometriosis.¹

Group	Number of points	Median	Minimum	Maximum
<i>miR451</i> expression ($P = 0.719$)				
Stage I/II endometriosis	8	1.860	0.070	10.630
Stage III/IV endometriosis	35	1.830	0.010	250.10
<i>MIF</i> mRNA expression ($P = 0.999$)				
Stage I/II endometriosis	8	0.275	0.010	0.750
Stage III/IV endometriosis	35	0.260	0.120	5.720
MIF protein expression ($P = 0.839$)				
Stage I/II endometriosis	8	0.275	0.010	1.820
Stage III/IV endometriosis	32	0.470	0.005	2.420

Data are expressed as the ratio ectopic/eutopic.

¹Data were not normally distributed and were therefore analyzed for each end-point using the non-parametric Mann–Whitney test.
