

SUPPLEMENTARY FIG. S5. Potential NF- κ B regulatory feedback mechanism in HMSCs on the expression and secretion of IL1 β and IL6. Effects of neutralizing of IL1 β , IL6, and NF- κ B blocking (PTDC) on the mRNA expression level of IL1 β (A) and IL6 (B). Effects of NF- κ B blocking (PTDC) on the secretion of IL1 β (C) and IL6 (D) in culture medium.
