

**Figure S3: Inhibitory properties of MMV666023 and MMV020750.** (A) Enzyme activity in the presence of increasing inhibitor concentration. Numbers shown on curves are inhibitor concentration in  $\mu\text{M}$ . (B) Dixon plot for calculation of  $K_i$  where [S1] and [S2] are two different substrate concentrations ( $\ll K_M$  of enzyme).
