

Instructions for building and running PathVisio from source

1. Retrieve the latest version of the PathVisio source code from the SVN repository:

PathVisio 3.1.3

http://svn.bigcat.unimaas.nl/pathvisio/branches/milestone_36.x/

2. Run ant (<http://ant.apache.org/>) in the pathvisio main directory.

This takes a few seconds to build all the individual modules.

Requirement: Java 1.6 or higher

3. Start PathVisio by either running pathvisio.sh (on Linux and Mac OS) or pathvisio.bat (on Windows)
-

Instructions for running PathVisio using binary installation

1. Download the binaries for PathVisio 3.1.3:

http://pathvisio.org/data/releases/3.1.3/pathvisio_bin-3.1.3-r3968.zip

2. Unzip the zip file

3. Start PathVisio by either running pathvisio.sh (on Linux and Mac OS) or pathvisio.bat (on Windows)
