

Additional file 2. Stability of RTA_{DHF} and RTA_{IHF}. Coomassie Blue-stained 12% SDS/PAGE gels showing the effect of the incubation of 500 ng of wild-type ricin A-chain, RTA wt, and modified ricin A-chains: RTA_{DHF} and RTA_{IHF}, with increasing concentrations of pronase. Digestion patterns for denatured forms of RTA are also shown.
