

Figure S2 RTQ-PCR transfection efficiency validation in Res-Let cells transfected with the inhibitor of miR-125b-5p or the inhibitor of miR-205-5p, the mimic of miR-424-3p, or their respective negative controls. (A) RTQ-PCR transfection efficiency validation in the Res-Let cells transfected with either the negative control of inhibitors, miR-125b-5p inhibitor, miR-205-5p inhibitor or **(B)** with either the negative control of mimic or miR-424-3p mimic (mean \pm SD from at least three independent experiments).
