

Supplementary Data

SUPPLEMENTARY FIG. S1. Expression profile of naïve and transduced MSCs. Quantitative graphs showing mRNA expression levels of IGF-I, HGF and TWEAK in naïve (*light gray bars*) and AdGFP-MSCs (*gray bars*) or AdIGF-I-MSCs (*black bars*) transduced MSCs. * $\sigma P < 0.05$ versus AdGFP-MSCs; **** $\sigma\sigma\sigma\sigma P < 0.0001$ versus DMEM
