

Inventory of Supplemental Information

Supplemental Data

1. Figure S1, Related to Figure 1

Antibody detection of co-receptors in mouse tissue, single panel immunofluorescence channels, additional co-immunofluorescence analysis, and RT-qPCR data for HH pathway components in both mouse and human samples.

2. Figure S2, Related to Figure 2

Additional co-injection experiment growth curves and SHH expression from human pancreatic tumor cells

3. Figure S3, Related to Figure 3

Histological and RT-qPCR analysis of subcutaneous co-injection tumors,

4. Figure S4

RT-qPCR analysis of angiogenic factors from fibroblasts, additional CAM assays with mouse tumors cells as well as fibroblasts alone.

Supplemental Experimental Procedures

Additional experimental procedures not included in main text.

Supplemental References

Additional references not in main text that are cited in supplemental experimental procedures.
