

Figure S1: Showy and non-showy appearance in peach is attributed to cell size. Micrographs showing cell length and cell width (μm) in petals of VABM29 (a) and V85331 (b) flowers taken at the anthesis stage. Scale bar = $40 \mu\text{m}$. Length and width of petals cells in VABM29 ($n = 25$) and V85331 ($n = 25$) (c).
