

Figure S3: Phylogenetic analysis of peach JAZ proteins. Phylogenetic tree was constructed based on the available sequences for *Arabidopsis thaliana* (At), *Nicotiana attenuate* (Na), *Solanum lycopersicum* (Sl), *Vitis rupestris* (Vr), *Nicotina tabacum* (Nt) along with *Prunus persica* (Pp) JAZ proteins. PpJAZ proteins were indicated by black circles in the phylogram.
