

SUPPLEMENTARY FIG. S5. Body weight and tissue mass of *Nrf1(b)*-KO and *Nrf1(b)*-WT mice. (A) Body weight distribution of mice at various ages. $n=19-25$. (B) Body weight of age-matched mice. Age ranges of male and female mice are 90–108 and 104–120 days, respectively. $n=10-15$. (C) Tissue mass of *Nrf1(b)*-KO mice and their wild-type littermates [*Nrf1(b)*-WT]. $n=3$. $*p < 0.05$ versus *Nrf1(b)*-WT.
