<sup>a</sup> Designation according to [87], aliases are in parentheses.

<sup>b</sup> According to the March 2006 assembly (NCBI36/hg18) of the human genome sequence at the Human Genome Browser [88].

<sup>c</sup> *de novo* infected LC5-RIC cells.

<sup>d</sup> persistently infected LC5 cells.

<sup>e</sup> The provirus sequence is transcribed as part of lncRNA TMCC1-AS1.
