

SUPPLEMENTARY FIG. S3. S1 nuclease probing of PNA–plasmid complexes. pGT4 plasmid with (lanes 2 and 4) or without (lanes 1 and 3) G₄T₄G₄ PNA was probed with S1 nuclease before (lanes 1 and 2) or after (lanes 3 and 4) linearization with restriction enzymes and ³²P labeling. Lane 5 is the DNA sequencing lane showing the positions of guanines. G₄T₄G₄ insert marked with the *bracket*.
