

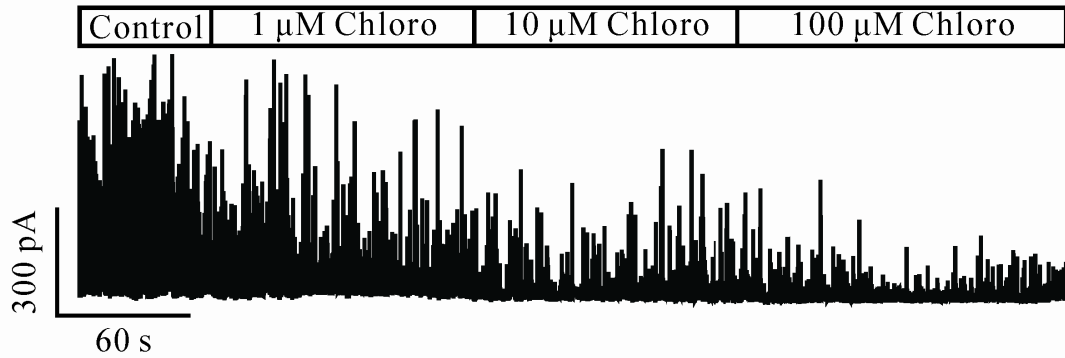

Figure S1

A

B

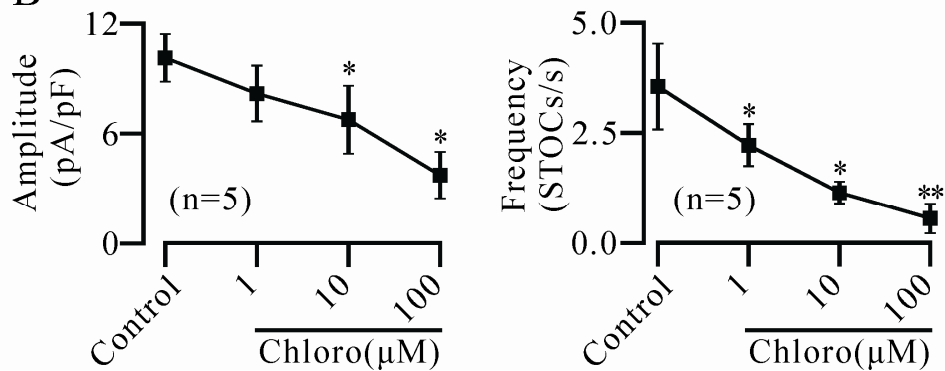

Figure S1. Chlora inhibits STOCs. (A) STOCs were recorded at 10 mV, which were gradually inhibited by chlora. **(B)** The dose-dependent inhibition of amplitude and frequency from 5 cells. * denotes $p < 0.05$ (versus control); ** denotes $p < 0.01$ (versus control). These data show that chlora dose-dependently inhibits STOCs.
