

Local Control of Brain Metastasis

Supplementary Figure 1. Kaplan-Meier plots showing overall survival after brain metastasis (OSBM) and brain metastasis-specific progression-free survival (BMPFS), subdivided by subtypes. All p -values were obtained by the log-rank test. (A) OSBM, $p=0.002$. (B) BMPFS, $p < 0.001$. HR = hormone receptor; HER2 = human epidermal growth factor receptor 2; TNBC = triple-negative breast cancer.
