

Supplementary Figure 2. Kaplan-Meier plots showing overall survival after brain metastasis (OSBM) for types of local treatment, subdivided by subtype. All *p*-values were obtained by the log-rank test. (A) HR+HER2-, *p*=0.036. (B) HR+HER2+, *p*=0.319. (C) HR-HER2+, *p*=0.391. (D) Triple-negative, *p*=0.028.

HR=hormone receptor; HER2=human epidermal growth factor receptor 2; FBT=focal brain treatment; TNBC=triple-negative breast cancer.
