

S3 Fig. Exon/Intron structure of *CBLs* and *calcineurin B* genes from various species

S3 Fig. Exon/Intron structure of *CBL* genes of *O. tauri* (*OtCBL1*), *C. variabilis* (*CvCBL1*), *P. patens* (*PpCBL1-4*), *C. arietinum* (*CaCBL1-10*) and *calcineurin B* gene of *S. cerevisiae*. Exons and Introns are represented by black boxes and lines, respectively. Scale is represented at the bottom of figure for estimation of exon, intron and gene sizes. The figure was generated by Gene Structure Display Server 2.0.
