<i>Msr1</i>	CTGGACAAACTGGTCCACCT	TCCCCTTCTCTCCCTTTTGT

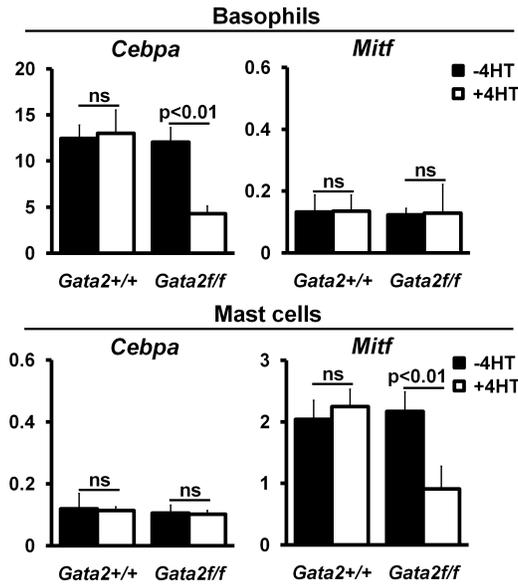

Supplemental FIGURE 1

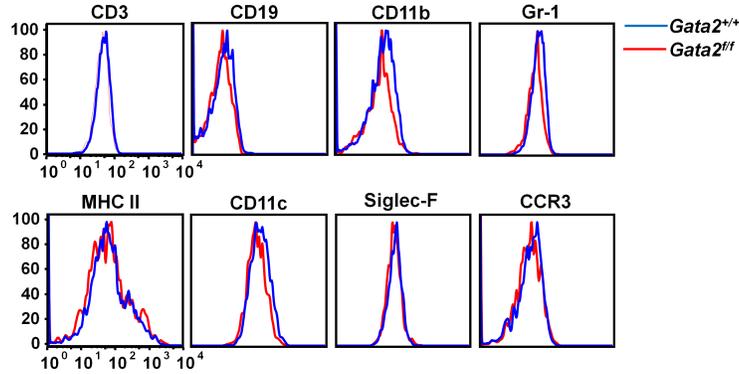

**Supplemental FIGURE 1.** *Gata2* haploinsufficiency is not observed in maintaining FcεRIα expression on basophils and FcεRIα and c-Kit expression on mast cells. **(A)** FACS analysis of 4-week BMDCs treated with 4HT (gated on YFP<sup>+</sup> cells). **(B)** MFIs of FcεRIα and c-Kit expression on YFP<sup>+</sup> *Gata2*<sup>+/+</sup> mast cells, *Gata2*<sup>+/-</sup> mast cells or “*Gata2*<sup>-/-</sup> mast cells” (mean ± SD, n=2).

Supplemental FIGURE 2

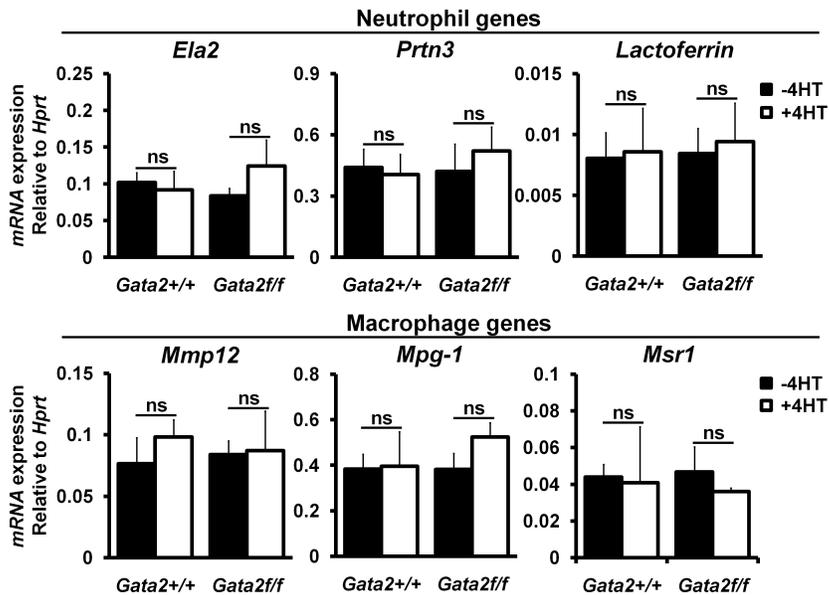

A

B

C

**Supplemental FIGURE 2.** Analysis of re-expression of lineage-specific genes or cell surface markers. **(A)** qPCR analysis of *Cebpa* and *Mitf* mRNA expression in the FACS-sorted YFP<sup>+</sup> *Gata2*<sup>+/+</sup> or *Gata2*<sup>-/-</sup> basophils at day 5 after the initial 4HT treatment or in the FACS-sorted YFP<sup>+</sup> *Gata2*<sup>+/+</sup> mast cells or “*Gata2*<sup>-/-</sup> mast cells” at day 11 after the initial 4HT treatment (mean ± SD, triplicates). **(B)** Expression of T cell, B cell, neutrophil and macrophage, dendritic cell, or eosinophil surface markers on YFP<sup>+</sup> *Gata2*<sup>+/+</sup> mast cells or “*Gata2*<sup>-/-</sup> mast cells” at day 11 after the initial 4HT treatment. **(C)** qPCR analysis of mRNA expression of neutrophil- and macrophage-specific genes in the FACS-sorted YFP<sup>+</sup> *Gata2*<sup>+/+</sup> mast cells or “*Gata2*<sup>-/-</sup> mast cells” at day 11 after the initial 4HT treatment (mean ± SD, triplicates). Data represent two independent experiments with similar results.
