Table S1. Differently expressed miRNAs by more than 2 FC detected using the deep sequencing method in Sup-T1 or T1 lymphocytes cell-lines . (A) 126 miRNAs which were up-regulated by more than 2 FC in the Sup-T1 cell-line. (B) 25 miRNAs which were down-regulated by more than 2 FC in the Sup-T1 cell-line. (C) 36 miRNAs which were up-regulated by more than 2 FC in the T1 cell-line. (D) 54 miRNAs which were down-regulated by more than 2 FC in the T1 cell-line.

Table S2. Differently expressed miRNAs by more than 2 FC detected using the TaqMan low-density array method in Sup-T1 lymphocyte cell-line. (A) 72 miRNAs which were up-regulated by more than 2 FC in the Sup-T1 cell-line. (B) 60 miRNAs which were down-regulated by more than 2 FC in the Sup-T1 cell-line.

Figure S1. Expression of let-7c, miR-34a and miR-124a following HIV-2 infection for 24 hours, 48 hours and 5 days. Normalized qPCR fold change results are presented.

Figure S2. The p21 protein is directly regulated by let-7c. Western blot analysis of p21 and actin in H9 cell-line following 72 hours of let-7c OE, (A) sample gel and (B) quantization of three experiments. Bands quantification was done using ImageJ software. (n=3, *p<0.05.)
