

Supplemental Figure 2.- Plasma Fatty (FA) acid profile at baseline obtained by LC/MS/MS using a top-down approach. Values are given as % of total plasma FA content (palmitic, 16:0; α -linolenic, 18:3; linoleic, 18:2; oleic, 18:1; stearic, 18:0; arachidonic, 20:4; eicosapentaenoic, 20:5; docosapentaenoic, 22:6).
