Additional file 3. Figure S2. Fetuin-A expression levels in urine samples

(a) Western blot analysis of Fetuin-A in urine samples of ADPKD patients ($n = 5$) and of patients with renal diseases other than ADPKD ($n = 6$). (b) ELISA quantification of Fetuin-A levels in urine of ADPKD ($n = 66$), healthy volunteers ($n = 17$) and control patients with various renal diseases ($n = 50$). Solid lines indicate mean. (c) Correlation between western blot and ELISA analyses. Line shows linear regression ($r = 0.992$).
