

Figure S6. Additional mutants with altered drug interactions. As Fig. 3C, for additional mutants that change the drug interactions between different drug pairs: (A-G) tetracycline-trimethoprim, (H-K) trimethoprim-mecillinam, (L-Q) chloramphenicol-trimethoprim, (R-T) tetracycline-ciprofloxacin, (U-Z) chloramphenicol-nitrofurantoin.
