

Supporting Information

Huang et al. 10.1073/pnas.1423533112

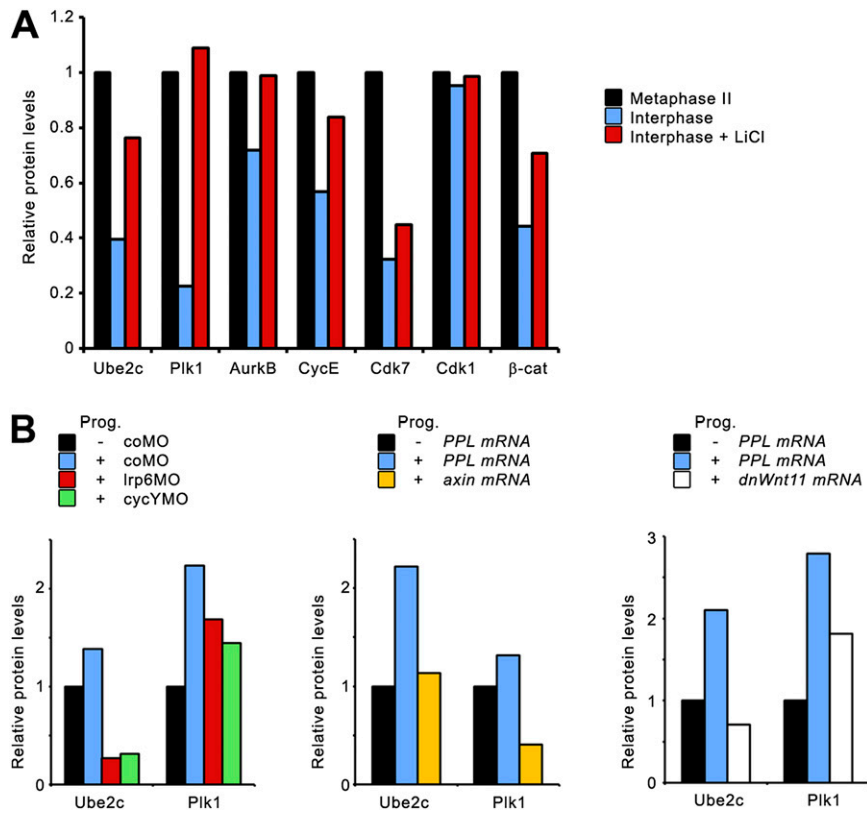

Fig. S1. Validation of Wnt/STOP targets in *Xenopus*. Quantification of the Western blots from Fig. 2D (A) and Fig. 2E (B). Protein levels were normalized to the loading control (ERK).

Dataset S1. Supplemental Excel tables containing the processed ProtoArray data of (i) the 3,873 proteins scored as polyUb positives and (ii) the top 864 LiCl hits with more than 1.8-fold down-regulation
