**Figure S1** Simplified map exhibiting mountains and rivers in the southern Tibetan Plateau. The map was generated using ArcGIS v10.1 (ESRI, CA, USA) and Adobe Illustrator CS5 v15.0.0 (Adobe Systems Inc., San Francisco, CA).

**Figure S2** Mismatch distributions (a) and Bayesian skyline plot (BSP) analyses (b) for the *Cytb* (sub)lineages. The demographic trend for the sublineage W2 was not investigated in the mismatch and BSP analyses because of the small sample size ( $n = 9$ ). Bars in the mismatch distributions represent the observed frequency of pairwise differences, and the dashed lines indicate the expected distribution under a model of population expansion. In the BSP, the thick solid line depicts the median estimate and the shading is the 95% highest posterior density (HPD) limits. The Y-axis (logarithmic scale) represents effective population size. The X-axis is the time-scale in million years ago (Ma).

**Table S1** Detailed information of GenBank accession numbers and haplotypes (Hap) of *Cytb*, *c-Myc2*, *Rhod* and *Tyr* for all the samples used in this study. For the abbreviation of each population see Table 1.
