Supplemental Figures

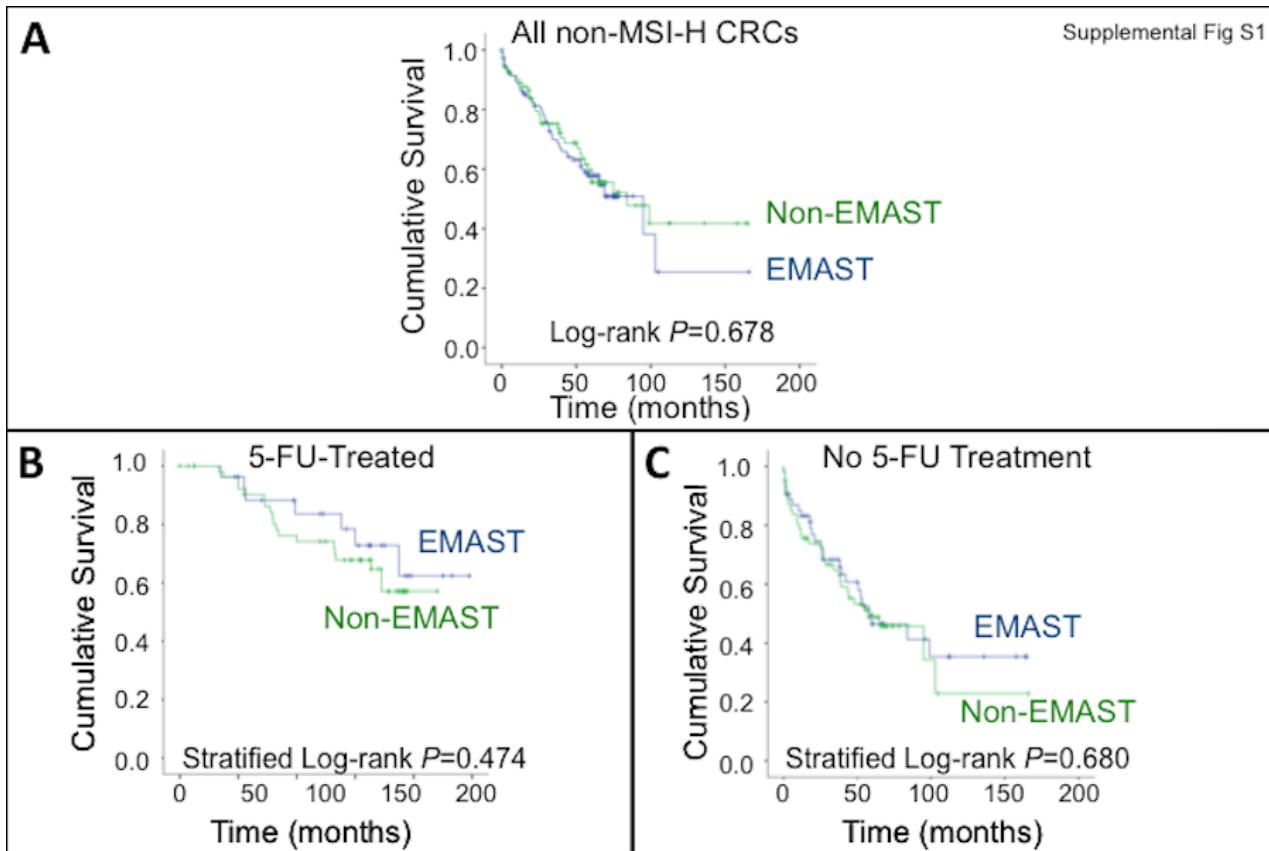

Fig. A. Kaplan-Meier plots of cumulative overall survival in patients segregated by EMAST status. (A) Cumulative overall survival of all patients without MSI-H separated by EMAST status ($P=0.678$, log-rank test). (B) Cumulative overall survival of all non-MSI-H patients receiving adjuvant 5-FU separated by EMAST status ($P=0.474$, stratified log-rank test). (C) Cumulative overall survival of all non-MSI patients who did not receive adjuvant 5-FU chemotherapy, separated by EMAST status ($P=0.680$, stratified log-rank test).
