S2 Figure. Expression patterns directed by diverse *unc-25* regulatory sequences in *C. elegans*. (A-C) *C. elegans unc-25* regulatory sequence drives expression of *mCherry* in all transgenic strains; (A) *M. hapla*, (B) *B. malayi*, (C) *T. spiralis unc-25* regulatory sequences drive expression of *GFP*. Animals photographed at 400x magnification. Images are mosaics of single animals.
