

Figure S6 Heat map of expression levels of the selected genes in MuSCs expanded in various media, related to Figure 6 Heat map of expression levels of the selected genes related to MuSC stemness, differentiation, cytokine receptors, dystrophy, apoptosis, and oncogenesis from MuSCs serially expanded in T cell conditional medium or cytokine cocktail containing medium compared to P0 MuSCs cultured in F10 medium for 12hrs. The passage number was indicated on top of the graph.
