

Figure S1. Expression level of Integrin αv and integrin $\alpha 4$ on T cells
(A) Levels of *Itgav* and *Itga4* mRNA were evaluated in splenic CD4⁺ T cells at indicated timepoints after LPS *i.p.* injection. **(B)** Integrin αv expression levels, determined by flow cytometer, on the splenic T cell surface at indicated timepoints after LPS *i.p.* injection.
