Suppl. Fig. 6. Effects of FA treatment on the levels of MDM2, TP53, CDKN1A and CDKN1B protein in COLO-205. (A) Treatment with FA (10 μ M) for 12 or 14 h increased the level of MDM2 protein in COLO-205. (B) The increased levels of TP53, CDKN1A and CDKN1B protein were observed in the COLO-205 after four days continuous treatment with FA (10 μ M).
