

S3 Fig. Mean concentration of soluble sugars, starch and protein in algal turfs of closed and open pools. (*) indicate significant differences (t-tests; Sugars, $t = -2.89$, $p = 0.014$; Starch, $t = -7.476$, $p < 0.001$; Proteins, $t = 0.628$, $p = 0.538$). Error bars represent standard error of the mean.
