This supplemental material contains:

Table S1: Validity of register-based RA serology

Table S2: Familial risks in siblings, offspring, and parents

Table S3: Familial risks by proband's sex

Figure S1: Venn diagram of RA cases ascertained from different data sources

Table S4: Descriptive statistics of the sample ascertained through the SRQ

Table S5: Replication of main findings using the SRQ

Table S6: Risk of RA associated with multiple affected relatives (Figure 2 in manuscript)
