

S1 Table. Overview of the OTUs found in the 12 plant samples, including their frequency, number of reads and BLASTN top hits with accession numbers in GenBank.

OTU ID	Freq.	Reads	phylum	Order	Family	Identification	Close GenBank match / Accession	Similarity	Originally reported habitat
OTU 1	10	779	Basidiomycota	Cystofilobasidiales	Cystofilobasidiaceae	<i>Mrakia frigida</i> ^a	<i>Mrakia frigida</i> AJ866977	99%(476/480)	Sediment in Russia (Siberia)
OTU 2	4	5226	Ascomycota	Venturiales	Venturiaceae	<i>Rhizosphaera macrospora</i> ^a	<i>Rhizosphaera macrospora</i> AF462431	97%(466/481)	Fungal conifer pathogens (<i>Abies alba</i>) in France
OTU 3	2	5	Ascomycota	Helotiales	Unassigned	Helotiales sp.	Uncultured fungus clone GU174334	94%(492/521)	Forest floor (<i>Acer saccharum</i>) in USA: Michigan, Manistee National Forest (43.6687N; 86.1431W)
							Uncultured Helotiales clone EU726288	93%(433/465)	Plant (<i>Pinus ponderosa</i>) in California woodland
OTU 4	2	5	Basidiomycota	Agaricostilbales	Agaricostilbaceae	Agaricostilbaceae sp.	<i>Bensingtonia sorbi</i> AY233343	90%(415/463)	Unreported
OTU 5	1	16	Ascomycota	Helotiales	Unassigned	Helotiales sp.	Uncultured <i>Tetracladium</i> clone KC694156	93%(428/462)	Plant roots (<i>Triticum aestivum</i>) in Sweden
OTU 6	6	469	Ascomycota	Xylariales	Amphisphaeriaceae	<i>Seeimatosporium</i> sp. ^b	<i>Seimatosporium walkeri</i> JN871207	95%(509/534)	Plant (<i>Eucalyptus</i> sp.) in Australia (Victoria)
OTU 7	1	11	Ascomycota	Chaetothyriales	Unassigned	Chaetothyriales sp.	Uncultured fungus clone KF274490	88%(343/388)	Wood stump (<i>Picea abies</i>) in Finland
							<i>Rhinocladiella</i> sp. EU139138	89%(336/379)	Lichen Umbilicariales in China (Hebei)
OTU 8	2	4	Basidiomycota	Tremellales	Unassigned	Tremellales sp.	Uncultured fungus clone JX383662	89%(337/379)	Soil in USA
							Uncultured Tremellales clone GU327507	96%(238/249)	Mycorrhizal seedling of <i>Epipactis helleborine</i> in Czech
OTU 9	3	142	Ascomycota	Chaetothyriales	Herpotrichiellaceae	Herpotrichiellaceae sp.	Herpotrichiellaceae sp. KF636410	94%(306/327)	Liverwort (<i>Barbilophozia hatcheri</i>) in Antarctica
OTU 10	1	70	Ascomycota	Unassigned	Unassigned	Ascomycota sp.	Uncultured fungus clone KC965841	95%(390/410)	Arctic soil in USA (69.67N; 148.72W)
							<i>Cyphellophora laciniata</i> NR121335	86%(361/419)	Skin of <i>Homo sapiens</i> in Switzerland
OTU 11	4	30	Basidiomycota	Unassigned	Unassigned	Basidiomycota sp.	Uncultured fungus clone KF800411	84%(467/556)	House dust in USA (Missouri, Kansas City)
							<i>Mrakia bolllopis</i> AB916516	83%(447/541)	Arctic bird feather in Norway
OTU 12	2	2	Basidiomycota	Tremellales	Unassigned	Tremellales sp.	Uncultured fungus clone KF274456	95%(352/369)	<i>Picea abies</i> stumps in Finland
							Uncultured Tremellales clone JF449484	99%(308/309)	Beech litter in Austria (Tyrol:Achenkirch)
OTU 13	1	2	Basidiomycota	Unassigned	Unassigned	Basidiomycota sp.	Uncultured fungus clone KF274089	87%(432/496)	<i>Picea abies</i> stumps in Finland
							<i>Rhodotorula</i> sp. FN548148	87%(433/497)	Living surface-sterilised leaves of <i>Fagus sylvatica</i> in Germany

OTU ID	Freq.	Reads	phylum	Order	Family	Identification	Close GenBank match / Accession	Similarity	Originally reported habitat
									(City of Greifswald, nature conservation area Elisenhain)
OTU 14	1	4	Ascomycota	Chaetothyriales	Herpotrichiellaceae	Herpotrichiellaceae sp.	<i>Cladophialophora minutissima</i> EF016383	94%(422/447)	Unreported
OTU 15	2	152	Ascomycota	Pleosporales	Leptosphaeriaceae	<i>Leptosphaeria</i> sp. ^b	Uncultured <i>Leptosphaeria</i> clone EU852362	97% (265/272)	Plant (<i>Fraxinus excelsior</i>) in Sweden
OTU 16	1	17	Ascomycota	Unassigned	Unassigned	Ascomycota sp.	Uncultured soil fungus clone GU083291	93%(298/322)	Soil in USA (Alaska)
							Uncultured Sebacinales clone FJ788795	87%(317/364)	Mycorrhizal root section of <i>Pterygodium caffrum</i>
OTU 17	1	3	Ascomycota	Unassigned	Unassigned	Ascomycota sp.	Uncultured fungus clone KC965419	99%(465/468)	Arctic soil in USA (69.67N; 148.72W)
							<i>Pseudocercospora nephrolepidicola</i> HQ599590	85%(347/406)	On leaves of <i>Nephrolepis falcata</i> in Australia
OTU 18	7	247	Basidiomycota	Cystofilobasidiales	Cystofilobasidiaceae	<i>Mrakia</i> sp. ^b	Uncultured <i>Mrakia</i> isolate GU931743	99% (514/516)	House dust in Canada (45.2556N; 75.9204W)
OTU 19	3	57	Ascomycota	Helotiales	Rutstroemiaceae	Rutstroemiaceae sp.	<i>Lambertella</i> sp. AB705255	94%(485/517)	Unreported
OTU 20	2	129	Ascomycota	Helotiales	Unassigned	<i>Tetracladium</i> sp. ^b	Uncultured <i>Tetracladium</i> clone KC694156	97% (494/507)	Roots of <i>Triticum aestivum</i> in Sweden
OTU 21	1	4	Ascomycota	Helotiales	Unassigned	Helotiales sp.	Uncultured mycorrhizal fungus AB669661	99% (467/472)	Unreported
							Uncultured Helotiales clone KC455325	99% (449/451)	Root system in Arctic tundra (USA: Anaktuvuk River Fire, AK)
OTU 22	7	624	Ascomycota	Unassigned	Unassigned	<i>Oleoguttula</i> sp. ^b	Uncultured fungus clone KC966025	96%(496/515)	Arctic soil in Canada (76.23N; 119.30W)
							<i>Oleoguttula mirabilis</i> KF309972	96%(448/468)	Unreported
OTU 23	1	3	Basidiomycota	Tremellales	Unassigned	<i>Cryptococcus</i> sp. ^b	Uncultured Basidiomycota clone GU328524	97%(478/494)	Oe layer in Forest
							<i>Cryptococcus</i> sp. HG324303	96%(440/456)	Soil in Germany (Biosphere area Schwäbische Alb)
OTU 24	3	10	Ascomycota	Helotiales	Helotiaceae	<i>Articulospora</i> sp. ^b	<i>Articulospora tetracladia</i> EU998929	95%(315/332)	Unreported
OTU 25	2	61	Ascomycota	Unassigned	Unassigned	Ascomycota sp.	Uncultured ascomycete clone AM901772	91%(464/510)	House dust in Finland
OTU 26	5	534	Ascomycota	Capnodiales	Unassigned	Capnodiales sp.	Uncultured fungus clone KC965669	98% (480/490)	Arctic soil in USA (69.15N; 148.85W)
							<i>Penidiella ellipsoidea</i> JF499843	91%(471/518)	Leaf bracts (<i>Phaenocoma prolifera</i>) in South Africa
OTU 27	2	37	Ascomycota	Microascales	Halosphaeriaceae	<i>Monodictys arctica</i> ^a	Uncultured fungus clone GU817175	97% (239/302)	Root systems of <i>Bistorta vivipara</i> in Norway (Svalbard Midtre Lovenbreen) (78.90555N; 12.08450E)
							<i>Monodictys arctica</i> EU686522	97% (291/299)	Roots of <i>Saxifraga oppositifolia</i> in Canadian High Arctic
OTU 28	10	1968	Basidiomycota	Tremellales	Unassigned	<i>Cryptococcus</i> sp. ^b	Uncultured <i>Cryptococcus</i> clone KC753413	99% (491/496)	Plant (<i>Triticum aestivum</i>) stem in Sweden

OTU ID	Freq.	Reads	phylum	Order	Family	Identification	Close GenBank match / Accession	Similarity	Originally reported habitat
OTU 29	1	7	Unassigned	Unassigned	Unassigned	Fungus sp.	Uncultured fungus clone KF297272	99%(462/467)	Arctic soil in Canada (76.23N; 119.30W)
OTU 30	5	277	Ascomycota	Pleosporales	Melanommataceae	<i>Herpotrichia</i> sp. ^b	Fungal sp. KF527818	96%(368/384)	Plant (<i>Carex bigelowii</i>) root in Finland
							<i>Herpotrichia juniperi</i> JX981496	96% (334/348)	Plant in Poland
OTU 31	8	258	Basidiomycota	Tremellales	Unassigned	Badidiomycota sp.	Uncultured <i>Cryptococcus</i> clone KC753413	99%(213/216)	Plant stem (<i>Triticum aestivum</i>) in Sweden
OTU 32	6	104	Ascomycota	Capnodiales	Davidiellaceae	<i>Cladosporium</i> sp. ^b	<i>Cladosporium</i> sp. KF367501	99%(561/562)	Untreated drinking water sources in Portugal
OTU 33	3	455	Ascomycota	Helotiales	Unassigned	Helotiales sp.	Uncultured <i>Helicodendron</i> clone GU931747	92%(347/376)	House dust in Canada (45.2556 N, 75.9204W)
OTU 34	3	629	Ascomycota	Capnodiales	Unassigned	Capnodiales sp.	<i>Catenulostroma protearum</i> GU214628	89%(511/571)	Plant (<i>Hakea sericea</i>) in South Africa
OTU 35	2	13	Ascomycota	Chaetothyriales	Unassigned	Chaetothyriales sp.	Uncultured fungus clone KC965234	96%(494/513)	Arctic soil in Canada (76.23N; 119.30W)
							<i>Herpotrichiellaceae</i> sp. JQ272383	87%(473/541)	USA (GRSMNP, Laurel Falls)
OTU 36	5	201	Ascomycota	Helotiales	Hyaloscrophaceae	<i>Mycoarthris corallinus</i> ^a	Uncultured Helotiales isolate GU931728	97%(487/500)	House dust in Canada (45.2556N; 75.9204W)
							<i>Mycoarthris corallinus</i> AF128440	97%(460/473)	Unreported
OTU 37	2	42	Ascomycota	Capnodiales	Teratosphaeriaceae	Teratosphaeriaceae sp.	Uncultured fungus clone KF296855	99%(413/417)	Arctic soil in Canada (78.78N; 103.55W)
							<i>Teratosphaeria jonkershoekensis</i> EU707864	91%(402/441)	Plant (<i>Protea</i> sp.) leaf in South Africa
OTU 38	2	435	Ascomycota	Helotiales	Unassigned	<i>Tetracladium</i> sp. ^b	Uncultured <i>Tetracladium</i> clone GU327472	97%(517/533)	Mycorrhizal seedling (<i>Epipactis atrorubens</i>) in Czech (Lednice)
OTU 39	7	881	Ascomycota	Pleosporales	Unassigned	Pleosporales sp.	Fungal sp. JX978255	97%(420/431)	2 or 3 year-old twig tissue from adult narrowleaf cottonwood growing in a common garden
							Pleosporales sp. AB751503	96% (394/411)	Unreported
OTU 40	2	342	Basidiomycota	Sebacinales	Sebacinaceae	<i>Sebacina</i> sp. ^b	Uncultured <i>Sebacina</i> clone JQ420971	99%(499/503)	Plant species <i>Vaccinium myrtillus</i>
OTU 41	2	2	Ascomycota	Dothideales	Dothioraceae	Dothioraceae sp.	Uncultured fungus clone KF274441	93%(412/443)	<i>Picea abies</i> stumps in Finland
							<i>Aureobasidium</i> sp. KJ690089	91%(402/442)	Ectomycorrhize of <i>Eucalyptus camaldulensis</i>
OTU 42	2	705	Ascomycota	Xylariales	Amphisphaeriaceae	Amphisphaeriaceae sp.	Uncultured fungus clone KC966357	99%(518/519)	Arctic soil in Canada (73.22N; 119.56W)
							<i>Discosia pseudoartocreas</i> KF777161	93%(415/448)	Plant leaves (<i>Tilia</i> sp.) in Austria (Innsbruck)
OTU 43	1	9	Ascomycota	Pleosporales	Leptosphaeriaceae	Leptosphaeriaceae sp.	Uncultured fungus clone KF742590	89%(385/432)	Imprted asymptomatic live woody plant (<i>Berberis</i>) material in

OTU ID	Freq.	Reads	phylum	Order	Family	Identification	Close GenBank match / Accession	Similarity	Originally reported habitat
									USA
							<i>Leptosphaeria conlecta</i> AF181702	92%(277/300)	Unreported
OTU 44	5	26	Ascomycota	Capnodiales	Cladosporiaceae	<i>Rachicladosporium monterosium</i> ^a	Uncultured fungus clone KC966122	97%(511/526)	Arctic soil in USA (69.67N;148.72W)
							<i>Rachicladosporium monterosium</i> KF309940	97% (403/416)	Unreported
OTU 45	2	92	Ascomycota	Capnodiales	Teratosphaeriaceae	Teratosphaeriaceae	<i>Teratosphaeria alistairi</i> JX556227	93%(358/385)	Leaves (<i>Protea repens</i>) in South Africa (Hermanus)
OTU 46	1	2	Basidiomycota	Thelephorales	Thelephoraceae	<i>Tomentella</i> sp. ^b	<i>Tomentella</i> sp. JQ711817	98%(450/461)	Ectomyorrhiza (<i>Pinus contorta</i>) in Canada (55.45N; 123.20W)
OTU 47	1	13	Ascomycota	Diaporthales	Gnomoniaceae	<i>Apiognomonia cf. errabbunda</i> ^a	<i>Apiognomonia cf. errabbunda</i> FN548166	99%(531/536)	Living surface-sterilised leaves of <i>Fagus sylvatica</i> in Switzerland: Hofstetten near Basle, Swiss Canopy Crane
OTU 48	3	57	Ascomycota	Helotiales	Helotiaceae	Helotiaceae sp.	<i>Claussenomyces</i> sp. HQ533008	94%(503/533)	New Zealand
OTU 49	3	201	Basidiomycota	Cystofilobasidiales	Cystofilobasiidae	<i>Udeniomyces</i> sp. ^b	Uncultured <i>Udeniomyces</i> clone KC753422	99%(521/527)	Plant (<i>Triticum aestivum</i>) stem in sweden
OTU 50	4	71	Ascomycota	Pleosporales	Phaeosphaeriaceae	<i>Phaeosphaeria juncophila</i> ^a	Uncultured fungus clone FJ820772	99%(501/504)	Air sample in Germany
							<i>Phaeosphaeria juncophila</i> AF439488	99%(456/458)	Plant (<i>Juncus articulatus</i>) in Switzerland
OTU 51	1	84	Ascomycota	Xylariales	Amphisphaeriaceae	Amphisphaeriaceae sp.	Uncultured fungus clone KC966357	97%(392/405)	Arctic soil in Canada (73.22N; 119.56W)
							<i>Discosia pseudoartocreas</i> KF777161	92%(396/432)	Plant leaves (<i>Tilia</i> sp.) in Austria (Innsbruck)
OTU 52	1	4	Ascomycota	Pleosporales	Lophiostomataceae	<i>Lophiostoma</i> sp. ^b	Uncultured soil fungus clone DQ420814	98%(495/505)	Soil in USA (Cedar Creek, Minnesota)
							<i>Lophiostoma arundinis</i> AJ496633	96%(484/503)	Plant
OTU 53	2	47	Basidiomycota	Leucosporidiales	Leucosporidiaceae	<i>Leucosporidiella muscorum</i> ^a	<i>Leucosporidiella muscorum</i> FR717869	99%(488/491)	Plant (<i>Paxillus involutus</i>) in Germany (51.5N; 11.94E)
OTU 54	3	1627	Ascomycota	Helotiales	Unassigned	<i>Leptodontidium</i> sp. ^b	Uncultured soil fungus clone EU490132	97%(504/522)	Savanna soil under mesquite (<i>Prosopis glandulosa</i>) in USA (33.85 N; 99.44 W)
							<i>Leptodontidium orchidicola</i> KF646097	96%(501/522)	Plant root of <i>Rosa rugosa</i> in Lithuania
OTU 55	1	2	Ascomycota	Capnodiales	Cladosporiaceae	Cladosporiaceae sp.	Uncultured fungus clone KC965721	95%(483/511)	Arctic soil in Canada (78.78N;103.55W)
							<i>Rachicladosporium pini</i> JF951145	91%(490/541)	Plant needles (<i>Pinus monophylla</i>) in Netherland
OTU 56	1	7	Ascomycota	Capnodiales	Unassigned	<i>Capnocheirides</i> sp. ^b	<i>Capnocheirides</i> sp. FR871188	97%(428/442)	Leaf of <i>Rhododendron</i>

OTU ID	Freq.	Reads	phylum	Order	Family	Identification	Close GenBank match / Accession	Similarity	Originally reported habitat
OTU 57	1	350	Ascomycota	Pleosporales	Pleosporaceae	Pleosporaceae sp.	Uncultured mycorrhizal fungus clone AY929129	94%(490/519)	Root of <i>Stipa hymenoides</i> in semi-arid grassland (USA:Virginia Park, Canyonlands National Part, UT)
							<i>Dendryphion penicillatum</i> JN578618	93%(443/477)	Spain
OTU 58	4	62	Ascomycota	Helotiales	Unassigned	<i>Tetracladium</i> sp. ^b	Uncultured <i>Tetracladium</i> clone KC694156	98% (519/531)	Roots of <i>Triticum aestivum</i> in Sweden
OTU 59	2	3	Ascomycota	Unassigned	Unassigned	Ascomycota sp.	Uncultured ascomycete clone AM902002	86%(469/544)	House dust in Finland
							<i>Rhinocladiella</i> sp. EU139138	86% (469/543)	Lichen (<i>Umbilicaria vellea</i>) in China (Hebei)
OTU 60	4	97	Ascomycota	Pleosporales	Pleosporineae	<i>Leptosphaeria</i> sp. ^b	Uncultured <i>Leptosphaeria</i> clone EU852362	99% (516/519)	Plant (<i>Fraxinus excelsior</i>) in Sweden
OTU 61	2	11	Basidiomycota	Pucciniales	Melampsoraceae	<i>Melampsora epitea</i> ^a	<i>Melampsora epitea</i> GQ479257	97% (221/228)	Willow in Canada (Nunavut, Keewatin District, Chesterfield Inlet)
OTU 62	1	8	Basidiomycota	Unassigned	Unassigned	Basidiomycota sp.	Uncultured fungus clone KF274456	87%(375/431)	<i>Picea abies</i> stumps in Finland
							Uncultured Basidiomycota clone GU328523	88%(355/405)	Oe layer in a fortested landscape
OTU 63	1	11	Ascomycota	Helotiales	Dermateaceae	<i>Helgardia</i> sp. ^b	Uncultured ascomycete clone AM901839	99% (509/512)	House dust in Finland
							<i>Helgardia</i> sp. HQ533816	99% (459/462)	Antarctic lake
OTU 64	4	13	Basidiomycota	Tremellales	Unassigned	<i>Cryptococcus tephrensis</i> ^a	<i>Cryptococcus tephrensis</i> DQ000318	98% (501/511)	Plant leaves
OTU 65	2	812	Ascomycota	Xylariales	Amphisphaeriaceae	Amphisphaeriaceae sp.	Uncultured fungus clone KC966357	97% (400/413)	Arctic soil in Canada (73.22N; 119.56W)
							<i>Discosia pseudoartocreas</i> KF777161	90%(395/441)	Plant leaves (<i>Tilia</i> sp.) in Austria (Innsbruck)
OTU 66	3	46	Ascomycota	Helotiales	Unassigned	<i>Cadophora luteo-olivacea</i> ^a	<i>Cadophora luteo-olivacea</i> HM116747	99% (530/534)	Plant (<i>Vitis vinifera</i>) in New Zealand
OTU 67	3	14	Basidiomycota	Tremellales	Unassigned	<i>Cryptococcus</i> sp. ^b	Uncultured fungus clone KC966331	99% (481/486)	Arctic soil in Canada (78.78N; 103.55W)
							<i>Cryptococcus</i> sp. KC455886	99% (426/428)	Snow with superficial sediment in Italy (Helbronner peak, Mont Blanc, Italian Alps)
OTU 68	2	2	Ascomycota	Helotiales	Unassigned	Helotiales sp.	Ascomycota sp. FM207647	91%(436/480)	Surface sterilised roots of <i>Deschampsia antarctica</i> in Antarctica (South Orkney Islands, Shingle Cove) (60.39S, 45.33W)
							<i>Varicosporium delicatum</i> KF730848	94%(354/377)	Unreported

OTU ID	Freq.	Reads	phylum	Order	Family	Identification	Close GenBank match / Accession	Similarity	Originally reported habitat
OTU 69	1	11	Ascomycota	Hypocreales	Unassigned	<i>Acremonium rutilum</i> ^a	Uncultured fungus clone KC965330	99%(445/448)	Arctic soil in USA (70.31N; 147.99W)
							<i>Acremonium rutilum</i> NR077124	97%(422/435)	Moist greenhouse wall in Germany
OTU 70	1	17	Ascomycota	Unassigned	Unassigned	Ascomycota sp.	Uncultured fungus clone KF274173	91%(361/398)	<i>Picea abies</i> stumps in Finland
							Uncultured ascomycete clone AM901896	86%(362/422)	House dust in Finland
OTU 71	1	5	Ascomycota	Unassigned	Unassigned	Ascomycota sp.	Pleosporales sp. HQ631002	82%(356/432)	Unreported
OTU 72	5	6	Unassigned	Unassigned	Unassigned	Fungus sp.	Uncultured fungus clone KF742601	99%(345/347)	Imported asymptomatic live woody plant material (<i>Prunus</i>) in USA
OTU 73	3	46	Ascomycota	Chaetothyriales	Herpotrichiellaceae	<i>Rhinocladiella</i> sp. ^b	Uncultured fungus clone KC965227	98%(558/570)	Arctic soil in Canada (76.23N; 119.30W)
							<i>Rhinocladiella</i> sp. FJ948175	97%(507/521)	Rock-inhabiting fungus from Aketao (Xinjiang, China)
OTU 74	9	1048	Ascomycota	Pleosporales	Unassigned	Pleosporales sp.	Uncultured fungus clone GU817184	98%(504/513)	Root system (<i>Bistorta vivipara</i>) in Norway (Svalbard Midtre Lovenbrean) (78.90555N; 12.08450E)
							Pleosporales sp. AB751503	98% (483/493)	<i>Salix arctica</i> leaf and stem litter on deglaciated moraines in high-arctic Canada
OTU 75	1	6	Basidiomycota	Tremellales	Unassigned	Tremellales sp.	Uncultured Basidiomycota clone GU328576	91%(474/521)	Oe layer in forest
							<i>Cryptococcus skinneri</i> NR073211	91% (439/485)	Unreported
OTU 76	4	1076	Ascomycota	Pezizales	Unassigned	Pezizales sp.	Uncultured fungus clone KF296725	97%(475/490)	Arctic soil in Canada (76.23N; 119.30W)
							<i>Phialea strobilina</i> EF596821	92% (302/327)	Needle in Norway
OTU 77	1	252	Ascomycota	Helotiales	Unassigned	Helotiales sp.	Uncultured fungus clone KF274367	97%(485/498)	<i>Picea abies</i> stumps in Finland
							Helotiales sp. HQ608110	97%(466/482)	Trachymyrmex septentrionalis nest in USA (Stengl Biology Station, Texas)
OTU 78	2	77	Ascomycota	Pleosporales	Leptosphaeriaceae	Leptosphaeriaceae sp.	Uncultured fungus clone KC965764	95%(449/473)	Arctic soil in Canada (78.78N; 103.55)
							<i>Leptosphaeria doliolum</i> JF740206	93%(357/384)	Rudbeckia in Netherlands
OTU 79	2	217	Ascomycota	Helotiales	Unassigned	Helotiales sp.	Uncultured <i>Cadophora</i> clone GQ219956	91%(415/456)	Soil in Germany (Thuringia, Hainich)
OTU 80	4	225	Ascomycota	Unassigned	Unassigned	<i>Eleutheromyces subulatus</i> ^a	<i>Eleutheromyces subulatus</i> KJ710471	99%(485/487)	Decaying host (Russulaceae) in Canada (Alberta)

OTU 240	2	155	Ascomycota	Pleosporales	Unassigned	<i>Phoma herbarum</i> ^a	Unculured <i>Epicoccum</i> clone FN539073	90%(478/533)	Beech sapwood in United Kingdom (53.63N; 7.69W)
							<i>Phoma herbarum</i> FN868459	97% (382/394)	Spanish stands of <i>Pinus halepensis</i>
OTU 241	3	11	Ascomycota	Unassigned	Unassigned	Ascomycota sp.	Uncultured fungus clone KF296938	99%(452/453)	Arctic soil in Canada (76.23N; 119.30W)
							<i>Umbilicaria hyperborea</i> AF096216	86%(416/485)	Unreported
OTU 242	1	5	Ascomycota	Helotiales	Unassigned	Helotiales sp.	<i>Lambertella</i> sp. AB705255	94%(378/402)	Unreported
OTU 243	1	38	Ascomycota	Chaetothyriales	Herpotrichiellaceae	<i>Rhinocladiella</i> sp. ^b	Uncultured fungus clone KC965227	97%(538/557)	Arctic soil in Canada (76.23N; 119.30W)
							<i>Rhinocladiella</i> sp. FJ948175	97%(499/512)	Rock-inhabiting fungus from Aketao (Xinjiang, China)
OTU 244	2	1045	Ascomycota	Venturiiales	Venturiaceae	<i>Venturia alpina</i> ^a	<i>Venturia alpina</i> EU035446	98%(561/571)	Plant (<i>Arctostaphylos alpina</i>) in Switzerland

OTU ID	Freq.	Reads	phylum	Order	Family	Identification	Close GenBank match / Accession	Similarity	Originally reported habitat
OTU 245	6	779	Ascomycota	Helotiales	Hyaloscyphaceae	Hyaloscyphaceae sp.	Uncultured Helotiales isolate GU931728	96%(474/494)	House dust in Canada (45.2556N; 75.9204W)
OTU 246	2	3	Ascomycota	Capnodiales	Teratosphaeriaceae	Teratosphaeriaceae sp.	<i>Teratosphaeria parva</i> EU707877	92%(302/346)	Plant (<i>Protea nitida</i>) leaf in South Africa
OTU 247	4	3776	Basidiomycota	Pucciniales	Melampsoraceae	<i>Melampsora</i> sp. ^b	Uncultured <i>Melampsora</i> clone JN646154	99%(492/497)	Plant (<i>Salix reticulata</i>) in United Kingdom (Scotland)
OTU 248	1	22	Ascomycota	Chaetothyriales	Herpotrichiellaceae	Herpotrichiellaceae sp.	Uncultured endophytic fungus clone KF060234	90%(496/552)	Plant (<i>Decalepis araya/pathra</i>) root in India
							<i>Phaeomoniella</i> sp. JN225891	90% (446/494)	Plant (<i>Nothofagus menziesii</i>) leaves in New Zealand
OTU 249	3	678	Ascomycota	Pleosporales	Unassigned	<i>Phoma herbarum</i> ^a	<i>Phoma herbarum</i> FN868459	99%(518/522)	Spanish stands of <i>Pinus halepensis</i>
OTU 250	1	6	Basidiomycota	Pucciniales	Melampsoraceae	<i>Melampsora</i> sp. ^b	Uncultured <i>Melampsora</i> clone KC883611	98%(394/404)	uredospores on infected leaves (<i>Salix caprea x purpurea</i>)

^aFor sequence identities ≥ 97%, the genus and species were accepted.

^bFor sequence identities between 95% and 97%, only the genus was accepted.
