Supplementary information

Supplementary Figure S1: Trends in the percentage contribution of food groups to Ca and Zn supply between 1992 and 2011. Africa (a), Americas (b), Asia (c), and Europe and Oceania (d). The line graphs were drawn using Tableau Software for Desktop version 8.2.

Supplementary Table S1: Food supply by FBS food item, reference year, and country.

Supplementary Table S2: Food Balance Sheet (FBS) food items obtained from FAOSTAT.

Supplementary Table S3: Nutrient and phytate composition of food commodities (Ca and Zn composition data from USDA nutrient database SR 26 [USDA SR 26]; phytate composition from the Tanzanian food composition table [Tanzanian FCT]).

Supplementary Table S4: Dietary energy supply ($\text{kcal capita}^{-1} \text{d}^{-1}$) by Food Balance Sheet (FBS) food item, reference year, and country.

Supplementary Table S5: Population size by age/gender group, reference year, and country.

Supplementary Table S6: Country-level Ca, Zn and phytate supplies, WtdEAR, phytate:zinc molar ratio and population between 1992 and 2011.

Supplementary Table S7: Global-level Ca and Zn supply, WtdEAR and deficiency risks between 1992 and 2011.

Supplementary Table S8: Continental-level Ca and Zn supply, WtdEAR and deficiency risks between 1992 and 2011 (mean \pm SD; national-level data were weighted by population size).

Supplementary Table S9: Regional-level Ca and Zn supply, WtdEAR and deficiency risks between 1992 and 2011 (mean \pm SD; national-level data were weighted by population size).

Supplementary Table S10: Gross national income based on purchasing power parity (GNI-PPP) by country for comparison with the supplies and deficiency risks of Ca and Zn, and energy between 1992 and 2011. GNI-PPP obtained from the World Bank (<http://data.worldbank.org/indicator/NY.GNP.PCAP.PP.CD>, Accessed on 09 July 2014).

Supplementary Table S11: Estimated Ca and Zn deficiency risks in 1992 and 2011; target Ca and Zn deficiency risks in 2011, consistent with MDG1 to halve hunger in the period 1990-2015; and national MDG1 Ca and Zn deficiency risk reduction target status (Yes/No).

Dietary calcium and zinc deficiency risks are decreasing but remain prevalentDiriba B. Kumssa^{1,2,3}, Edward J. M. Joy^{1,2}, E. Louise Ander², Michael J. Watts², Scott D.
